- Fluent in English, other languages such as Spanish or French are an advantage
- Statistical knowledge and comprehension is an advantage

Be part of our excellent team and contribute to climate protection. Workplace in the European Union preferred / Latin America possible. We look forward to receiving your application including a motivational letter focused on the job description in English with CV, in a digital format of your choice, with next possible starting date via e-mail to jobs@forliance.com.

Uschi Dellian
Manager HR & Office

WHAT WE OFFER:

- Collaboration in an international interdisciplinary and dynamic team
- A casual work environment with impact
- A comprehensive introduction to our team and processes while providing the space to develop your own solutions – new ideas are expressly welcome

OUR MISSION:

We let values **GROW**:

- we grow well financed, managed and monitored forests and ecosystems
- we grow long-term alliances with project stakeholders and clients
- we grow financial mechanisms and payment for ecosystem services to scale and improve projects
- we grow transparency and traceability through robust carbon standards, digital solutions, and earth observation technologies
- we grow the competency of our team by trainings, education and onboarding world leading experts

We create positive impact on our **CLIMATE**:

- we partner with implementation organizations, international investors and development banks to develop the most robust climate projects
- we help industry clients to account and manage their greenhouse emissions
- we monitor, report and verify impact and results of performance indicators
- we create climate solutions that are based on scientific research
- we initiate transformation to fight climate change and to achieve carbon targets.

We take **ACTION**:

- we mobilize finance for ecosystem services and develop new integrated value chains together with local stakeholders
- we use nature to build robust and proven carbon sinks by applying internationally recognized carbon standards and methodologies
- we turn carbon reduction plans into concrete action, and projects
- we think new ways and combine proven nature-based solutions with innovative financial mechanisms and state-of-the-art technology
- we unlock new climate action project types and promote developing of new methodologies for carbon sinks
